

Abstract

A fuel cell array comprising a fuel cell stack (12) with several fuel cells (10) and a first (14) and a second end plate (16) defining the fuel cell stack (12) on the end thereof, and a device for fixing the fuel cell array to a housing (38). At least one force transmitting device (18) is provided which transmits a first force to the first end plate (14) in the direction of the second end plate (16) and a second force to the second end plate (16) in the direction of the first end plate (14). An elastic arrangement (20) is involved in the transmission of force.
